

SCL Tile Coat

Scientifically Tested

Application details

Method of application *SCL Tile Coat* can be applied by brush, roller or spray. Apply two coats with sufficient drying time in between. Avoid excess pooling and over coating.

New tiles Apply as soon as possible after installation. Remove excess sand. Apply above 4°C. Do not apply to wet surfaces or if rain is imminent.

Old tiles Fully clean off moss and dirt from surface with power wash, apply detergent to suit and sterilisation wash to prevent moss re-growth. Allow to dry thoroughly.

Cleaner Clean all equipment with clean water.

Overcoating time 4-6 hours (dependent on temperature)

Precautions

- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- Remove splashes from skin with a recognised hand cleaner.
- Keep out of reach of children.

Intended uses

Ready to use to enhance, renovate and protect concrete and terracotta roof tiles.

Product description

A high quality water-based acrylic coating, for use in the renovation and recoating of tiled roofs. *SCL Tile Coat* is designed to protect roof tiles by repelling water and to improve energy efficiency. This has been achieved by incorporating an insulating additive (spheres) into the material.
