Protect & insulate concrete roof tiles
with Ceramic Spheres technology

TILE COAT

ROOF RENOVATION COATING SYSTEM
WITH INSULATING ADDITIVES

The science of
roof tile protection...

SCL Tile Coat contains insulating Ceramic Spheres. This weather-proof, microporous and colour-fast roof coating with a fungicidal additive, is designed to protect and make roofs look like new.

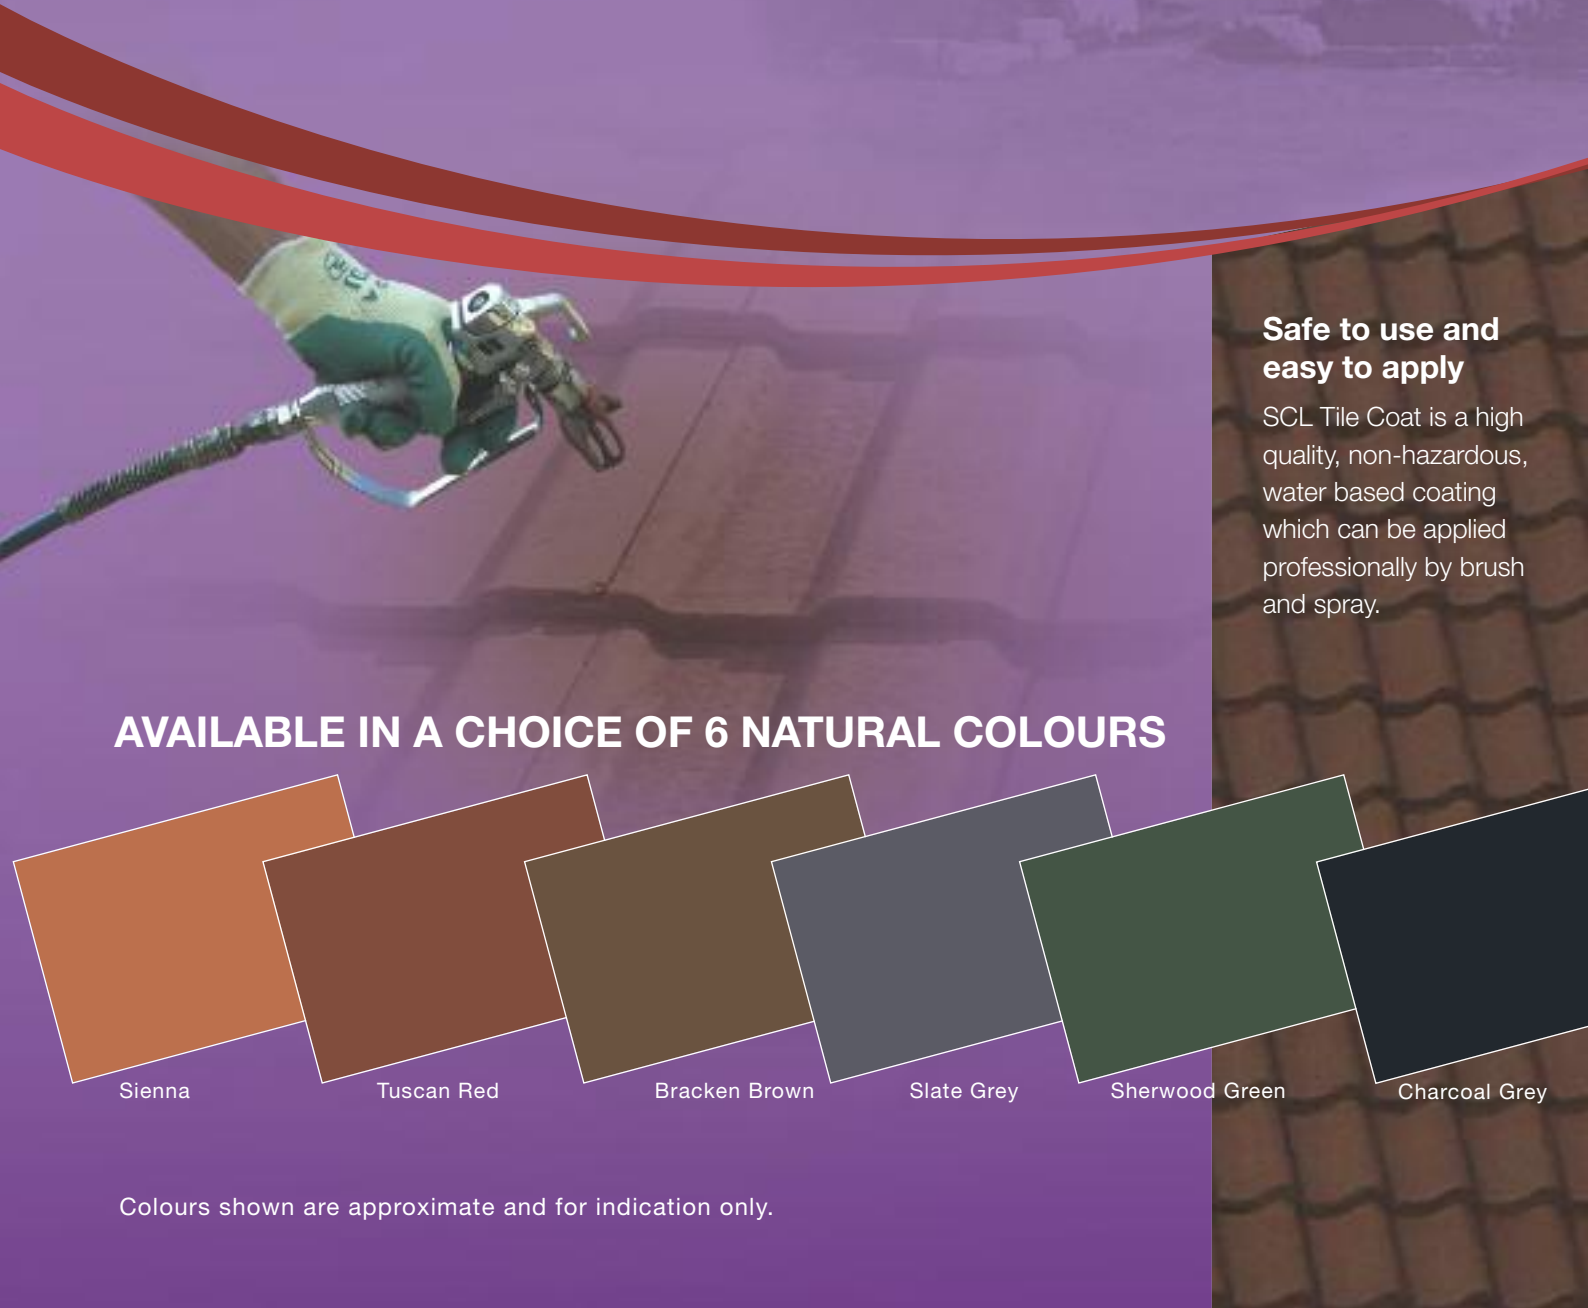

SCIENTIFICALLY TESTED

Scientifically developed and tested to protect roof tiles in today's climate

SCL Tile Coat has been specially formulated to allow roofs to breathe. After application a microporous skin is formed which acts as a water barrier. This revolutionary coating will make a roof look like new and protect it for years to come.

SEAMLESS COATINGS – SCL Tile Coat System is part of a wide range of liquid applied systems including:

Flat and pitched roof coatings, smooth and textured wall coatings, single pack and two pack epoxy floor coatings.

Safe to use and easy to apply

SCL Tile Coat is a high quality, non-hazardous, water based coating which can be applied professionally by brush and spray.

AVAILABLE IN A CHOICE OF 6 NATURAL COLOURS

Sienna

Tuscan Red

Bracken Brown

Slate Grey

Sherwood Green

Charcoal Grey

Colours shown are approximate and for indication only.

Applied by brush or spray

Protects against all types of weather

Helps insulate against heat and cold

SCL Tile Coat is manufactured to the highest specification and is completely eco-friendly

2 coat system protects for up to 10 years

A high quality water based coating containing energy efficient Ceramic Spheres. SCL Tile Coat is designed to protect roof tiles by repelling water.

SCL Tile Coat can help play a part in reducing energy consumption and costs required for heating and cooling homes

The Ceramic Spheres in SCL Tile Coat allow the roof to breathe while keeping water resistance to a maximum, giving it a long lasting colour retention. They also provide an insulating coat that can help reduce energy consumption and costs required for heating and cooling homes.

SCL Tile Coat makes roofs look like new

Scientifically tested and approved

History of insulating additives

Insulating coatings have been available commercially for well over a decade. Insulating roof and wall coatings incorporating additives have been used by commercial painting contractors on the facilities of major corporations and manufactures.

Laboratory tested

The list of companies using paint to improve energy efficiency include such firms as Shell Oil, Ikea, British Readymix, Hyundai, IBM, Exxon, Ford Motor Company and many many more.

Eco-friendly properties

The use of complex blends of Ceramic Spheres, which have the appearance of fine powder, can help reduce the energy consumption and costs required for heating and cooling homes, warehouses, metal buildings and other industrial or commercial structures. For the residential consumer they will help create a more energy efficient home.

Meets today European insulating requirements

These products are some of the fastest growing energy saving/insulating products available today.
